

Chess pattern reflective materials are available in standard patterns and both for sew-on and heat transfer materials.

Depending on needs and usage areas, the reflective material can be EN ISO 20471 certified (fx. green chess pattern) or EN 469 and/or EN ISO 11612 certified (fx. red chess pattern). There are two standard patterns for 50 mm wide reflective bands (either two squares high or four squares high). Get in contact to find the best solution for your needs.
