Reflectors from Reflectil come nicely packed individually in either promotional packaging or retail packed.

Reflective Accessories

Most of us have had the very unpleasant experience of almost driving into someone near the road at night. One cost efficient way of becoming recognizable to drivers is the use of reflective accessories.

Simply put, a small reflector can be a very cheap and nice looking life insurance. When you buy them from Reflectil, we make sure that they are all certified and approved, even when you print a logo or design on it.
