

About Reflectil-YEZI

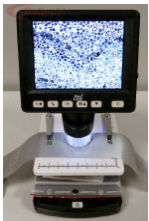

Reflectil Yezi AB is a joint venture between the Norwegian based Reflectil group and YEZI Reflex corporation in South Korea.

The purpose of the company is to offer European safety garment manufacturers and garment decorators, reflective materials with a high level of service and specialized product solutions tailored to local market needs.

The head office is located near Gothenburg, Sweden. Operations with stocks and converting services is located near Porto, Portugal. Production of raw materials takes place in the Seoul factory.

Product Development and Testing

In our in-house laboratories in Seoul and Porto, we control and test that our products are according to the defined product specifications.

Our testing instruments include reflectometers, digital microscopes, washing machinery and Martindale abrasion tests.

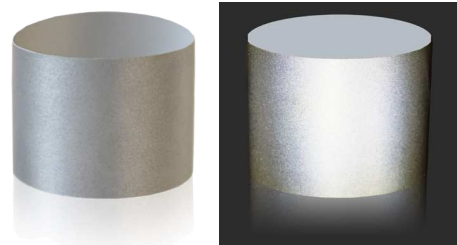

Reflectil-YEZI Customer Support

The market for professional clothing is in continuous development with new demands emerging from changing customer needs and preferences. Choosing the correct reflective material for a particular application is not always an easy task for the garment maker.

Examples of supports are finding optimal application methods for transfer materials and supplying samples for customer specific garments and prototypes for tenders.

Sew-on Reflective Materials

Our range of EN ISO 20471 reflective sew-on tapes are the preferred choice for many professional work wear manufacturers. The materials are available in 50 mm tapes as standard, but can be supplied in any width to your choice.

Heat Transfer Reflective Materials

Our range of reflective heat transfer films features excellent reflective performance and bonding properties whatever the condition. The materials are available in 50mm tapes as standard, but can be supplied in any width or made into a logo to your choice.
